

HOW DOES ROMA NG FIT INTO ROMA?

Analysis of the assessment data will be assisted by the framework of the National Theory of Change (TOC). Local agency Annual Report data must be a part of the assessment process.

The National TOC and local agency TOCs guide meaningful strategic planning. Details on how CSBG funds are used can support decision making. The NPIs provide a way to unify the networks'

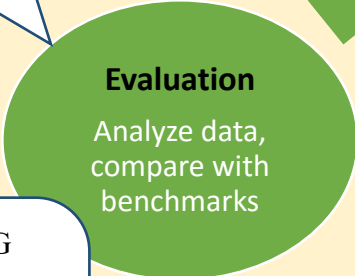

Once services are completed and outcomes observed, the entire ROMA NG framework will help guide the analysis of the data to support evaluation of what worked and for whom success was achieved

A standardized list of services and strategies will help agencies share information about what they do to address community needs and

The ROMA NG framework helps agencies observe and report success through NPIs at both Community and Family level. Demographic reports identify the characteristics of individuals and families served. Agencies identify "Efforts in Progress" as well as outcomes

- Did the service and strategies do what was expected?
- Did our outcomes address the identified needs?
- Did the outcomes achieved (as identified by NPIs) validate the assumptions behind the selection of the service and strategies identified in our Theory of Change?
